intro This survey has two components: 1) asking for feedback about the class and 2) asking about what you want to review, topic-wise, in class on Wednesday.

likeclass What do you like about the class?

- The discussion aspect
 - Overall, I just find the material pretty interesting. I also like how we peer-review our work.
 - Its very relaxing
 - I like how the instructor provides additional practice problems to allow ourselves to test our knowledge. I also like the idea of connecting what we are learning to various current journal articles.
 - I like how flexible it is to my learning. We are able to choose what articles we want to do assignments on.
-

betersupport In what way could the instructor better support your learning?

- More detailed notes when we cover material in class
- n/a
- Explain the research articles a bit more

-Sometimes it is difficult to see the connection between the content of the course and the journals that we read. Often, the articles are at a higher/more in depth level than the content of the course, so it can be difficult to figure out what the takeaways should be for a given article. A general "so what" for each article could be helpful

-I wish there were slightly more in depth instructions to the assignments, as it is sometimes a little confusing on what to do.

improve Please identify area(s) where you think the course could be improved.

-Less brain specific, more general applying cognitive readings

-I think the quizzes tend to be a little long. I think more time should be allotted to them or they should be shortened. Moreover, I think that reading articles again every night can get a little boring, especially when we have another assignment due the next day.

-Maybe less discussions and go over stuff more

-The course could be improved by having more dedicated days for content. Instead of covering content and discussing the journal articles, I think my learning would be facilitated by having one day dedicated to just learning the content, and then another day for going over the articles we have read, and connecting the material to the article.

-I don't see any.

coursecontent To what aspects of the course material or concepts should more attention be given?

-The material we are expected to know

-I really enjoy the demos we do in class, as well as the interesting SciComm pieces.

-Memory is very interesting
